SUMMARY

I'm a developer who brings versatile technical and creative skills to every project I work on. Whether it's building polished player experiences, prototyping new mechanics, or helping others learn the craft, I'm passionate about what I do. I have a strong self-starter mindset, as I've also been designing and creating my own games as a personal hobby for roughly the last 8 years.

SKILLS

Programming: C#, C++, Java, Python, ARM

Game Development Engines: Unity, Unreal

Tools & Libraries: Visual Studio, Eclipse, Git, Blender, Figma, Canva, Krita

Platforms: Windows, iOS, Android, WebGL, Itch.io

Misc: Level/Environment Design, UI/UX, 2D Animation, Sound Design, Technical Art

EDUCATION

Bachelor's Degree in Computer Science

2019-2023

University of San Francisco

- Data Structures and Algorithms, Programming Language Paradigms, Computer Architecture with ARM, Search Engine Development, Machine Learning, Operating Systems, Discrete Mathematics, C and Systems Programming, Linear Algebra & Probability, Game Development.

WORK EXPERIENCE

Independent Game Developer

2025-Present

Cursebreakers

- Designed and implemented multiplayer gameplay systems using Unity/C# and Netcode for GameObjects.
- Developed synchronized interactable objects and gameplay state across networked clients.
- Implemented multiplayer lobby/session functionality.
- Designed first-person horror investigation mechanics.
- Created environmental and level-design workflows.
- Implemented proximity voice communication.
- Optimized gameplay and rendering for target hardware.

Game Developer

2024-2026

AAC+

- Developed and implemented software and gameplay systems in Unity/C#, with a focus on game design, optimization, and developer tools.
- Contributed to environmental design, lighting, sound design, and UI/UX to improve the application's presentation and user experience.

- Led UI/UX development efforts by coordinating a UI/UX designer, establishing priorities, reviewing progress, communicating project decisions, and aligning design direction with product goals.

Game Design Intern

2023

Sports Media

- Designed tutorials, character movement, puzzles, and mini-games for a financial game.

Unity 3D Developer Intern

2023

i3m

- Developed Unity prototypes including a bullet-hell game, multiplayer hack-and-slash game, and smart light controller.
- Playtested and debugged i3m's flagship game, *VerCities*.

Lead Instructor

2022

Mission Bit

- Taught students basics in C# to create coroutines, user keyboard/VR input, audio clip manipulation, NavMesh pathfinding, and more in the Unity game engine for VR.
- Designed detailed curriculum plans, homework, and demonstrative C# code for students.
